

Cleveland Faucet Group®
Delivering real value.

A Moen Incorporated Brand

Total lower cost over the life of the product. Higher property value for you.

Presenting Cleveland Faucet Group (CFG®), a full line of faucets and valves designed and built for multi-family properties, delivering total lower cost for multi-family property owners.

CFG offers proven value for life. In fact, an independent survey found that CFG faucets cost 36% less to maintain compared to other brands. For property owners, this accrues to improved operating income and an increase in overall property value. You can't argue with total lower cost over the life of every CFG faucet you install.

What's more, CFG is dedicated to improving your business in other ways. We've teamed with the United States Green Building Council® (USGBC®) to conserve the water supply and promote water efficiency through the LEED® program. Such initiatives have earned us recognition as an industry leader for outstanding sustainability practices.

CFG customer service is as exceptional as our products. We offer a choice of convenient ways to communicate with us. Plus, you can depend on trained local sales support familiar with the specialized needs of the multi-family market.

Built around your bottom line
