2009 – 2010

WILMAR QUICK-REFERENCE GUIDE

Time is money. That's why we're pleased to bring you the 2009-2010 Wilmar quick-reference guide for Moen®, Cleveland Faucet Group® (CFG) and Creative Specialties® products. This brochure helps you quickly reference the Wilmar number for some of our most popular SKUs. A few items of note this year:

- **New "CA" SKUs.** A number of faucets in this brochure have a triangle icon in front of the Moen number indicating that there is a California AB1953/Vermont S152 compliant version available in stock. The full in-stock compliant list is on page 10 of this brochure. While all of Moen's faucets comply with the EPA's stringent lead safety standards, these states issue separate legislation which reduces the existing plumbing lead standard for faucets and plumbing fittings that convey drinking water to 0.25 percent.

The legislation does not go into effect until January 1, 2010. However, in an effort to make this transition easier for our customers, Moen has compliant versions of all of our existing kitchen and lav faucets available now. (**NOTE:** The "CA" SKUs listed in the back of this brochure are those that are currently in stock, but all "CA" equivalent SKUs can be ordered through the Wilmar special order program.)

- **Water-Saving Products.** Now more than ever, our products are designed to help conserve water – without sacrificing performance. From faucets that are certified to meet WaterSense® criteria to showerheads that contribute towards earning valuable LEED® points, we're creating a variety of eco-friendly choices.

As of January 1, 2009, all Moen and CFG lavatory faucet SKUs feature a 1.5 gpm aerator that is certified to meet WaterSense criteria. Several of our showerheads are available with a 1.75 gpm flow rate, which is a savings of up to 30% over standard showerheads.

Moen, CFG and Creative Specialties products are designed to perform – and we've designed this guide to perform for you. To place an order, or for additional information, please call 1-800-345-3000 or visit www.wilmar.com.

All MOEN® and CFG® lavatory faucets feature a flow-optimized aerator, using 30% less water without sacrificing performance, are certified to meet WaterSense® labeling criteria and contribute towards maximizing LEED® points.

YOUR PROPERTY REQUIRES PRODUCTS BUILT TO LAST

Water-Saving Products from CFG®

Cleveland Faucet Group is pleased to offer a host of water-efficient products. These designs reduce water consumption, energy costs and sewer bills, with the added benefit of contributing towards valuable LEED® points – more ways CFG delivers long-term value and exceptional return on investment to the multifamily market.

BATH

Lavatory Faucets

As of January 1, 2009, all lavatory faucets are manufactured with a 1.5 gpm aerator. The packaging label will clearly display the WaterSense® logo and the 1.5 gpm flow rate.

- use up to 30% less water
- certified to meet WaterSense® labeling criteria

SHOWER

Water-Saving Showerheads

- 1.75 gpm
- IAPMO Green listed
- use up to 30% less water
- rubber spray formers are easy to clean; simply wipe off any hard mineral deposits
- order as a stand-alone item or as an option on all Capstone® and Cornerstone® trim kits
- Available in Chrome and Brushed Nickel

Flow-Optimized Aerator Kits

- 1.5 gpm
- use up to 30% less water
- easy, low cost retrofit to any existing faucet

KITCHEN

Kitchen Faucet Service Kits

Available for all kitchen faucets, the flow-optimized aerator kits use up to 30% less water and are an easy, low-cost retrofit option.
